CHAPTER I: EXECUTIVE SUMMARY:**(a) About the industry**

Spinning is basically a sub-sector of Bangladesh's textile and clothing industry. It is also termed as Primary Textile Sector (PTS). PTS is the backbone of the clothing industry because it provides the backward linkage for both the knit and woven sectors. The primary job of spinning mills is to produce yarn from raw cotton. As per Bangladesh Textile Mills Association web site (BTMA), there are 424 yarn manufacturers. Out of 424, there are 341 yarn manufacturers which are currently in operation. Annual yarn spinning capacity of this industry is 2410 million kg. Main raw material of this sector is raw cotton which is mostly imported from USA, Australia, India, Pakistan, China, Central America, East & West Africa etc. During last fiscal year (2015-16), 1,375,257 Ton raw cotton was imported.

PTS contributes to economy in different ways as follows:

- Value addition in knit & woven RMG are over 70% & 35% respectively.
- Around 90% yarn demand for knit RMG & 35-40% yarn demand for woven RMG are met by Primary Textile Sector
- Local fabric demand & the yarn demand for handloom are also met by Primary Textile Sector
- PTS industries producing around 1200 MW power through Captive Generator.
- Generate huge cliental base for Banking, Insurance, Shipping, Transport, Hotel, Cosmetics, and Toiletries & related economic activities

The Government of Bangladesh also promote this Primary Textile Sector by extending various facilities such as Bonded Warehouse, Cash Assistance in lieu of Bonded Warehouse, Import of Capital Machinery, some Spare Parts, raw materials at a concessionary rate of duty and preferential tax rate.

CHAPTER VI: DESCRIPTION OF THE ISSUER:**(a) Summary of the Industry**

(i) Spinning is basically a sub-sector of Bangladesh's textile and clothing industry. It is also termed as Primary Textile Sector (PTS). PTS is the backbone of the clothing industry because it provides the backward linkage for both the knit and woven sectors. The primary job of spinning mills is to produce yarn from raw cotton. As per Bangladesh Textile Mills Association web site (BTMA), there are 424 yarn manufacturers. Out of 424, there are 341 yarn manufacturers which are currently in operation. Annual yarn spinning capacity of this industry is 2410 million kg. Main raw material of this sector is raw cotton which is mostly imported from USA, Australia, India, Pakistan, China, Central America, East & West Africa etc. During last fiscal year (2015-16), 1,375,257 Ton raw cotton was imported.

PTS contributes to economy in different ways as follows:

- Value addition in knit & woven RMG are over 70% & 35% respectively.
- Around 90% yarn demand for knit RMG & 35-40% yarn demand for woven RMG are met by Primary Textile Sector
- Local fabric demand & the yarn demand for handloom are also met by Primary Textile Sector
- PTS industries producing around 1200 MW power through Captive Generator.
- Generate huge cliental base for Banking, Insurance, Shipping, Transport, Hotel, Cosmetics, and Toiletries & related economic activities

The Government of Bangladesh also promote this Primary Textile Sector by extending various facilities such as Bonded Warehouse, Cash Assistance in lieu of Bonded Warehouse, Import of Capital Machinery, some Spare Parts, raw materials and at a concessionary rate of duty and preferential tax rate.

Business environment of the Issuer

In today's world environmental sustainability is a core component of sustainable success. Environmental sustainability is about finding innovative ways to minimize the impact of industrial operations on the environment through using state-of-the-art technologies. Sustainability means to take responsibility; Responsibility towards protecting the environment in which we live and operate. So, all products should be made in a caring and responsible way that preserves the environment for future generations. While improving working conditions and protecting the environment are certainly admirable goals, we have also proven to be good business strategies. Therefore, international community is getting increasingly interested in sustainable business and eco-friendly production. There is also a growing pressure on industries for environmental compliance, and at the same time international buyers are giving preference to green producers. Moreover, it is now apparent that companies that fail to integrate sustainability into their core strategies will fail to maintain their competitiveness over time.

Taking all these factors into consideration, Aman Cotton Fibrous Limited (ACFL) runs several programs to promote environment friendly green concepts among entrepreneurs and motivate them to adopt energy-efficient technologies and resource-efficient production technologies. In order to institutionalize the process, the Company has set up an Environment friendly WTP.

Besides, there are a good number of green Textile Industries in Bangladesh. Moreover, beyond the regulations and compliance of the government and buyers, many textiles have commendable environment-friendly practices like use of energy- and resource-efficient technology and machinery, ACFL is one of good Environmental Friendly Industry. Environmental sustainability is not a mere buzzword, rather it is an integral part of any business that wants to sustain in today's world and also in the days coming. This is also true for our Textile industry, which is gradually going green and ACFL has been making efforts to facilitate the process.

2017	A2 (Lr)	ST-2	30 December 2018	Stable

(c) The rationale or description of the rating(s) so obtained, as furnished by the credit rating agency(s);

Credit Rating Agency of Bangladesh Limited (CRAB) has reaffirmed the long-term rating of Aman Cotton Fibrous Ltd (hereinafter referred to as ACFL or the Company) at **A₂** (pronounced **Single 'A' Two**) and **A₂ (Lr)** rating of BDT 94.5 million aggregate Long Term Outstanding and BDT 20.0 million CC (Hypo) in the Long Term. CRAB has also retained **ST-2** rating of BDT 2,370.0 million aggregate fund and non fund based limits in the Short Term availed by the Company.

Credit Strengths

1. Positive Sales growth, stable financial position observed;
2. Established market position, stable customer profile, good product quality, tag with captive consumption of yarn reflect continuous capacity utilization of average 96.0% in last six years.
3. Continuing financial and operational flexibility of the Company arising from Aman group; experience of promoter in various industries;

4. Continuing business with diversified product range (across count ranges) is likely to insulate from decline in demand from any specific segment to an extent; moderate value addition facilities expected to provide relatively higher realization/margin.

Credit Concerns

1. Decreasing trend of yarn price, managing positive sales growth through increasing quantity;
2. Continuing high working capital intensity having very high CCC given the seasonal nature of cotton availability;
3. Although leverage position of the Company slightly improved in this surveillance period, borrowed fund of the Company is still above 2 times of its EBITDA;
4. Continuing earning vulnerability of the textile industry to exchange rates and cotton price fluctuations; fragmented industry structure with intense competition from both local and foreign company.

The assigned ratings of Aman Cotton Fibrous Ltd in this surveillance period positively factors in Company's positive sales growth after FY12 and stable financial position, having net profit margin stable to 16% in last two years, maintaining positive operating cash flow, strong equity base of BDT 3,129.3 million with improving debt to equity ratio, and satisfactory level of coverage position. Continuing financial and operational flexibility enjoyed by ACFL by virtue of being a part of the Aman Group which helped the Company survive from the volatility of world cotton and local yarn market continued in last few years; significant experience of the promoters in the textile, and other businesses; and benefits of having balanced presence across count ranges, captive yarn consumption, and maintaining capacity utilization on average of 96.0% in last six years; and good relation with the financing banks are also considered when the ratings of the Company derives.

The assigned ratings of the Company in this surveillance period are however constrained by decreasing trend of average selling price or yarn since FY12 and managing sales growth through increasing quantity. The outlook of the industry directly correlated with export orders received by the end users. The recessionary global outlook even though will be persistent, costly labor and production cost of competitive countries will move forward of the textile industry. Company's long presence in textile industry and management strength has led to reduced volatility in earnings in the past. Considering borrowed fund to EBITDA, Company's borrowed fund was still above 2 times than its EBITDA. Cash Conversion Cycle of the Company was above 400 days in last few years due to high inventory processing period and receivable collection period. The Company should address those issues going forward.

(d) Observations and risk factors stated in the Credit Rating Report:

The business model and competitive position of the Company in last few years is unchanged. After starting of its commercial operation in November 2007, the Company has already established presence in the cotton yarn market of the Country on the back of long-standing relationships with clientele through its diversified product range and product quality in last one decade. There were few changes in top 10 buyers of the Company in FY17 (3 changes), but they still contributed around 60% of total sales of the Company in the same period (around 65% in FY16). With below moderate customer concentration, 16.3% of its sales are made by the sister concern, which ensures revenues and stable production capacity utilization even during the slowdown, mitigates the risk to some extent.

ACFL has a wide product range diversified across cotton yarn, with the ability to manufacture count range from 20's to fine 40's. The Company fully concentrates on the medium counts (24's~30's), with major part of revenue coming from those counts that are largely marketed to the deemed export market. The Company imported cotton mostly from Uzbekistan, USA, etc cotton export countries. This, coupled with effective cotton mixing (Card, combed) ensures higher quality of yarn, helping the Company attract premium pricing in the market. The present count range provides stability to volumes, especially with the recent volatility in the demand for yarn.

(d) Description of the Business**(i) The date on which the issuer company was incorporated and the date on which it commenced operation and nature of business which the company and its subsidiaries are engaged in or propose to engage in;**

The Company was incorporated on December 28, 2005 and commenced its commercial production on 1st November 2007. ACFL does not have any subsidiary.

Nature of Business:

Aman Cotton Fibrous Limited is engaged in manufacturing of high quality combed and carded yarn from raw cotton ranging from 20's to fine 40's which has huge demand in the market. Most of its clients are export oriented knit garment manufacturing companies. As a result, its sales are deemed as export. At present, the company has 30,960 spindles capable of manufacturing 6,780 MT of yarn per year.

(ii) Location of the project

The Registered office and factory of the company is located at Boiragirchala, Sreepur, Gazipur, Bangladesh.

(iii) Plant, machinery, technology, process etc.**PLANT**

ACFL's factoryplant is an industrial complex having several buildings, where workers produces different type of carded and combed yarn ranging from 20's to fine 40's. Our factory has large warehouses and warehouse-like facilities that contain machinery and equipment used for production. The plant is located with access to multiple modes of transportation with adequate loading and unloading facilities.

The plant has been established in 2007 for the production of cotton yarn having 30,960 spindles capable of manufacturing 6,780 MT of yarn per year. Present capacity utilization is about 94% based on average yarn count of 30/s. Production capacity is based on a schedule of 300 working days per annum and 3 shifts of eight hours each per day. The working days are set by deducting Fridays and public holidays and assuming that annual maintenance works and unexpected work interruptions will take 25 days. The plant uses heat/electricity to transform streams of raw materials into finished products.

MACHINERY

Aman Cotton Fibrous Ltd. uses sophisticated machinery and equipment mostly imported from Germany, Switzerland, Italy, Japan and China to spin the finest quality cotton yarn conforming to global standards. The brand of major machinery brands is of Reiter, Toyota, Trutzscler, Trumac, Kaiser, Luwa etc. The list of major machinery and equipment used for the production of cotton yarn are given under the chapter Description of Property.

TECHNOLOGY

The manufacturing technology and machinery for yarn making operation have been imported from suppliers in Europe and Asia mostly European technologies especially, Germany, Switzerland and Italy are the prime suppliers of our technology. Among these machineries Rieter, Trutzchler, Trumac, Kaiser and Toyota brands have the reputation to be the best choice for the source of technology. For air conditioning equipment Luwa, Switzerland had been chosen. Air conditioning equipment is needed for production of all preparatory section such as blowing room, carding room, roving frame room and ring frame room, pinning section and yarn finishing sections.

PROCESS

ACFL imports raw materials i.e. cotton and stored in cotton warehouses. After testing quality, the raw cotton is taken into production floor. Then, raw cotton is feed into machine for processing. This starts with raw bales of cotton and processes them in stages until they produce yarn (fibers twisted into threads used in weaving or knitting).

The manufacturing process starts with stock cleaning and mixing of ginned cotton. After removing trash and foreign materials, the chute is transfer for further process of intense cleaning and mixing to carding. In this condition, the material becomes in a form of rope called carded sliver.

The carded sliver goes to drawing frames. In these processes the sliver becomes more even and well blended. Depending on the demand of the production schedule and staple length of fiber, the sliver obtained from the drawing frame goes to roving frame, comber machine or open end spinning.

*The company purchased 180 decimal Land out of total area of 199 decimal under the same DAG # 7739 and got mutation for 179.50 decimal i.e. 0.50 decimal less than the area mentioned in the deed. It may be mentioned that the rest 19 decimal (199-180) were sold to other two parties. In the process of mutation, the seller made a plea to the AC Land office during the hearing against the notice issued in favor of the seller of land for mutation purpose. During hearing the seller of the land requested the AC Land office for excluding 0.50 decimal land on which there was a family graveyard. From humanitarian and religious ground, the company has finally agreed to the plea of the seller and hence the land areas in the mutation were less than the area mentioned in the Land Deed by 0.50 decimal. Thus, the company is not in a position to provide rent receipt and mutation for that 0.50 decimal land.

(n) If the issuer has revalued any of its assets, the name, qualification and experiences of the valuer and the reason for the revaluation, showing the value of the assets prior to the revaluation separately for each asset revalued in a manner which shall facilitate comparison between the historical value and the amount after revaluation and giving a summary of the valuation report along with basis of pricing and certificates required under the revaluation guideline of the Commission;

Name of the Independent Valuer	S.H Khan & Co., Chartered Accountants
Valuer's Qualification	Chartered Accountant
Valuer's Experience	30 Years.
Valuer's Address	RazBhaban (1st floor), 29 Dilkusha C/A, Dhaka-1000.
Date of Signing Revaluation Report	May 20, 2013.
Nature of Revalued Assets	Land and Land development
Methods of Valuation	Net Realizable Value method (the market approach)
Assumptions	Generally Accepted Accounting Principles, Location, Size of the land, Commercial importance and facilities available and likely future appreciation.

Purpose of valuation:

The financial statements of the company have been prepared in accordance with Bangladesh Accounting Standard (BAS) based on historical cost convention previously. However, the value of land has increased due to high inflationary trend and devaluation of local currency. In this circumstance the management has decided to revalue the land to incorporate the fair value of these assets in the financial statements.

Basis of revaluation:

The Valuer has estimated the value of the land of the company under Estimated Net Realizable Value method (the market approach) depending on the nature of assets and rationale applicable.

Summary of revaluation of fixed assets as on May 15, 2013 is given below.

SL No.	Class of Fixed Assets	Revalued Amount (Taka)	Carrying Cost (Taka)	Revaluation Surplus (Taka)
1	Land	464,338,000	185,025,622	279,312,378
	Total	464,338,000	185,025,622	279,312,378

There is no material information, which is likely to have an impact on the offering or change the terms and conditions under which the offer has been made to the public.

(t) Business strategies and future plans - projected financial statements shall be required only for companies not started commercial operation yet and authenticated by Chairman, two Directors, Managing Director, CFO, and Company Secretary:

Business Strategies

ACFL's key strategic objectives are to

- Ensure sustainable growth and modernization of existing facilities with potential for success through increasing capacity and manufacturing efficiency;
- Achieve global competitiveness and to derive the full benefit of our demographic and wages advantage;
- Achieve a significant market share through specific marketing strategy;
- Achieve technological superiority;
- Strengthening financial resources;
- Maintain state-of-the-art manufacturing facilities for ensuring best quality products to the customers;
- Obtain world class accreditation by proper execution of ISO 9001:2008 standard and best practices that are proven effective

Future plans

From IPO Proceeds

In pursuance of aforesaid strategies, ACFL and its professional team have been working relentlessly keeping in mind the growth prospect as well. ACFL has a plan for massive expansion doubling its capacity to produce special yarn by acquiring brand new machineries using IPO proceeds (Use of IPO proceeds in detail shown in Chapter -XXII).

Other than IPO Proceeds

The company is constructing its new factory building on its 316.25 DCM Land situated at Boiragirchala, Sreepur, Gazipur from sources other than IPO proceeds. This new factory building will facilitate installing new machineries to be procured for producing special yarn that will contribute significantly to our existing earning streams.

Analysis of reasons for the changes in significant items of income and expenditure:

In the last few years, the price of cotton and yarn has fallen significantly in the international market that resulted in decrease in sales and cost of goods sold.

Causes for Changes in Sales

Revenue decreased for the year ended June 30, 2015 and 2016 due to fall in the sales price of yarn in international market.

Causes for Changes in Cost of Goods Sold

Cost of Goods sold decreased in 2015 and 2016 due to fall in the purchase price of Raw Cotton in international markets.

Causes for Changes in operating expense

There was no significant fluctuation in the other operating expenses except finance cost which decreased over the last four years due to decrease in interest rates and gradual settlement of term loan obligations.

Causes for Changes in non operating income

In 2013, ACFL realized capital loss from its investment in secondary market. Since the end of 2010, the capital market constantly fell with some fluctuation. Therefore, the investment made by ACFL had unrealized loss which was realized in 2013.

(1) Unusual or infrequent events or transactions including unusual trends on account of business activity, unusual items of income, change of accounting policies and discretionary reduction of expenses etc.

There are no unusual or infrequent events or transactions including unusual trends on account of business activity, unusual items of income and discretionary reduction of expenses.

Changes in accounting policies

There is no change(s) in the accounting policies of the Company during last three years other than depreciation policy changed in 2013 from straight line to reducing balance method and which has been followed consistently.

The Management of the Company has changed the method of depreciation upon a decision of Board of Directors of the Company. Which method of depreciation would be preferable and more realistic depends on the nature of the business and assets. Reducing Balance Method is being preferred when revenue earned during initial year is high and the economic life of the assets is higher than depreciation life. Moreover, it also depends on taxation rate.

Considering the nature of the major fixed Assets, the company has changed its method to reducing balance method as it gives more realistic picture than straight line method. Moreover, It commensurate with that of the Third Schedule of Income Tax Ordinance 1984. The estimated life of an asset with straight line method is much less than that of the economic life of our major capital assets and thus reducing balance method gives more representative and fair presentation of Fixed assets of the company.

(2) Significant economic changes that materially affect or are likely to affect income from continuing operations

There are no significant economic changes that materially affect or are likely to affect income from continuing operations.

(3) Known trends or uncertainties that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations

There are no known trends that have had or are expected to have a material adverse impact on sales, revenue or income from continuing operations except following uncertainties:

- Decrease in demand of the readymade garments products in the local and international market,
- Increased production cost
- Scarcity of raw materials
- Scarcity of gas
- Technological change
- Increased competition
- Govt. Policy change towards the industry
- Political unrest
- Natural calamities

(4) Future changes in relationship between costs and revenues, in case of events such as future increase in labor or material costs or prices that will cause a material change are known;

The issuer is aware of the fact that future is always uncertain that affects business and plan as well. So, in future labor price or material cost may change. However, revenue is always adjusted and follows the trend in line with production cost. Hence, any change in material cost is adjusted with sales price. However, labor cost is partially adjusted with the selling price and improving production efficiency which is a continuous process. It is worthwhile to mention that Bangladesh is one of the largest yarn producing countries in the world. We believe that like in the past we have the ability to set trends under any circumstances.

(5) The extent to which material increases in net sales or revenue are due to increased sales volume, introduction of new products or services or increased sales prices.

Any material increase in the sales volume, increase in selling price as well and introduction of new products would have a significant impact on the net sales and revenue of the Company. ACFL, however, does not have any plan to introduce any new product or services in near future. But the Management of the Company expects that there would have a positive and significant impact on the revenue and sales volume with the introduction of new machineries in its production process. It is also expected that due to increased competition in the market where ACFL operates, the revenue of the Company may be affected adversely due to decrease in selling price. If the new machineries are added with the existing pool as planned, the revenue of the Company would increase significantly.

(6) Total turnover of each major industry segment in which the issuer operated

YEAR	EXPORT OF RMG (IN MILLION US\$)	TOTAL EXPORT (IN MILLION US\$)	% OF RMG'S TO TOTAL EXPORT

(7) Status of any publicly announced new products or business segment

The Company did not announce any new products or business segment.

(8) The extent to which the business is seasonal;

In general, demand for yarn prevails throughout the year but it remains slightly higher during the months from November to July.

(w) Defaults or rescheduling of borrowings with financial institutions or banks, conversion of loans into equity along with reasons thereof, lock out, strikes and reasons for the same etc. during the history of operation of the company:

ACFL has never been defaulted in repayment of loan. It has not even rescheduled its loan due to default in making repayment of the same on due date. Moreover, there is no history of conversion of loan into equity, lock out and strikes.

(x) Details regarding the changes in the activities of the issuer during the last five years which may had a material effect on the profits or loss, including discontinuance of lines of business, loss of agencies or markets and similar factors;

There were no changes in the activities of the Company during the last five years and had not any material effect on the profits/loss, including discontinuance of lines of business, loss of agencies or markets and similar factors.

(y) Injunction or restraining order, if any, with possible implications;

There was no injunction or restraining order from any Court of Law or competent authority during the entire life of the Company's business.

(z) Technology, market, managerial competence and capacity built-up**TECHNOLOGY**

The manufacturing technology and machinery for yarn making operation have been imported from suppliers in Europe and Asia mostly European technologies especially, Germany, Switzerland and Italy are the prime suppliers of our technology. Among these machineries Rieter, Trutzchler, Trumac, Kaiser and Toyota brands have the reputation to be the best choice for the source of technology. For air conditioning equipment Luwa, Switzerland had been chosen. Air conditioning equipment is needed for production of all preparatory section such as blowing room, carding room, roving frame room and ring frame room, pinning section and yarn finishing sections.

Market

Spinning is basically a sub-sector of Bangladesh's textile and clothing industry. It is also termed as Primary Textile Sector (PTS). PTS is the backbone of the clothing industry because it provides the backward linkage for both the knit and woven sectors. The primary job of spinning mills is to produce yarn from raw cotton. As per Bangladesh Textile Mills Association (BTMA's) web site, there are 424 yarn manufacturers. Out of 424, there are 341 yarn manufacturers which are currently in operation. Annual yarn spinning capacity of this industry is 2410 million kg. Main raw material of this sector is raw cotton which is mostly imported from USA, Australia, India, Pakistan, China, Central America, East & West Africa etc. During last fiscal year (2015-16), 1,375,257 Ton raw cotton was imported.

Managerial competence

All the members of the management team of the company are equipped with required knowledge having long experience, skills and competencies. The departmental Heads are professionally qualified in their respective fields. The management team is led by Mr. Md. Rafiqul Islam, Managing Director and acts for the best interest of the company. Successive strong financial performance is the result of unwavering commitment of the promoters, management efficiency, employees' sincerity, use of appropriate technology, among others.

Capacities build up

To keep pace with the contemporary technology and customer demand, the company continuously investing and deploying enough resources including human resources. To cope up with the growing market demand and strengthening long term sustainability, the Company is going to expand its production capacity with latest modern technology and machinery.

(aa) Changes in accounting policies in the last three years

There is no change(s) in the accounting policies of the Company during last three years other than depreciation policy changed in 2013 from straight line to reducing balance method and which has been followed consistently.

The Management of the Company has changed the method of depreciation upon a decision of Board of Directors of the Company. CHAPTER VII: MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

a) Overview of business and strategies:

Overview of business:

According to the Bangladesh Garment Manufacturers and Exporters Association (BGMEA), the total fabric requirement in the captive market is about 3 billion yards, of which roughly 85 to 90 percent is imported from abroad. Fabric as well as Yarn demand is increasing at an average rate of 20 percent per year.

Under this context, it is likely that there will be new entrants in the market to make it more competitive. Because of an established marketing platform and a proven track record of performance in terms of quality and customers satisfaction, Aman Cotton Fibrous Limited enjoys its intrinsic strengths and capable of capitalizing the same for grabbing market opportunities in coming years.

Production Process

ACFL imports raw materials i.e. cotton and stored in cotton warehouses. After testing quality, the raw cotton is taken into production floor. Then, raw cotton is feed into machine for processing. This starts with raw bales of cotton and process them in stages until they produce yarn (fibers twisted into threads used in weaving or knitting).

The manufacturing process starts with stock cleaning and mixing of ginned cotton. After removing trash and foreign materials, the chute is transfer for further process of intense cleaning and mixing to carding. In this condition, the material becomes in a form of rope called carded sliver.

The carded sliver goes to drawing frames. In these processes the sliver becomes more even and well blended. Depending on the demand of the production schedule and staple length of fiber, the sliver obtained from the drawing frame goes to roving frame, comber machine or open end spinning

Finishing

The in-house finishing unit ensures that any yarn that moves out of our factory meets buyers' requirements. The finishing plant machineries are judiciously selected so that it can customize the process of cotton Yarn. The finishing range is equipped to do numerous kinds of special finishes Stain Resistant, Nano-Care and Anti Bacteria finish.

ACFL's Strategies

- Ensure sustainable growth and modernization of existing facilities with potential for success through increasing capacity and manufacturing efficiency;
- Achieve global competitiveness and to derive the full benefit of our demographic and wages advantage;
- Achieve technological superiority;
- Strengthening financial resources;
- Maintain state-of-the-art manufacturing facilities for ensuring best quality products to the customers;
- Obtain world class accreditation by proper execution of ISO 9001:2008 standard and best practices that are proven effective

(b) SWOT analysis:

A SWOT analysis is a structured planning method that helps to evaluate the strengths, weaknesses, opportunities and threats involved in a business venture. It identifies the internal and external factors that affect business venture. Strength and Weakness are evaluated with internal factors whereas Opportunity and Threat are evaluated by external factors. The SWOT analysis of the company is as follows:

Strengths

- State of the art factory located nearby Dhaka district;
- Established marketing platform and a proven track record of performance;
- Managed by a group of experienced professionals;
- Strong intellectual knowledge and market network;
- On an average company gets 80-90 percent repeat orders;

- Large capacity to cater to big orders;
- H & M nominated Factory;
- Long standing existence;
- Diversified business sector exposures;
- Uses sophisticated European and USA origin machineries;
- Standby power supply from own gas generators;
- Adequate supply of skilled workforce;
- Proven and reliable customers base;
- Availability of abundant good quality cotton from the local and international Market.

Weaknesses

- Market is becoming more competitive;
- Absence of few deferred service benefits that is imperative to attract and retain talents;
- Comparatively higher management cost;
- No backward and forward linkage entity;

Opportunities

- Increasing global demand for cheap clothing;
- Large population and low labor cost;
- Relocation of international apparel business to low cost countries like Bangladesh;
- Leverage on existing client base to enter new business verticals;
- Expanding domestic textile and garment as well as export market;
- Export reach can be enhanced through rigorous marketing efforts;
- Setting up of similar plant would entail heavy capital investment;
- Ample space available for expansion;
- Strong support from Government including incentives like Export Development Fund (EDF) facility.

Threats

- The Company and the whole industry will be adversely affected if political situation deteriorates;
- Major textiles & apparel export destination of Bangladesh is EU. Upward local currency fluctuation as against Euro could be a big threat in terms of export remittance;
- New entrants;
- Adverse change in Govt. policies;
- Imposition of embargo by any buyer country on our domestic products;
- Dependency more on overseas market for raw materials;
- Lack of power supply in future due to scarcity gas

Reason of fluctuation:**Revenue**

There was no significant fluctuation in the revenue during the last five years except sales of 2012-2013, 2014-2015 and 2015-2016 registering a decrease by 1.74, 13.21 and 0.91 percent respectively resulted from decline in the sale price of yarn both in the local and international markets as well as sales quantity reduction in 2014-2015.

Other Income

The Company incurred capital loss amounting Tk 11,134,062 in the year 2012-2013 resulted from the sale of shares.

Total Income

Fluctuation in the total income is the result of changes in the revenue and other income as narrated above.

Cost of Goods Sold (COGS)

There was no significant fluctuation in the COGS during the last five years except a favorable change in the years 2014-2015 and 2015-2016 registering a decrease by 13.44 and 1.33 percent respectively due to decline in the cost of raw cotton both in the local and international markets.

Finance Cost:

There was no significant fluctuation in the finance cost during the last five years. Finance cost has, however, decreased over the last years due to decrease in interest rates and gradual settlement of term loan obligations.

Depreciation and Amortization

There was no significant fluctuation in depreciation cost except for 2012-13 due to change in the depreciation policy from Straight Line Method to Reducing Balance Method. Since then the Company has been following the Reducing Balance Method consistently over the following years.

Other Expenses

Other expense is consistent over the last five years except 2013-2014 registering an increase by 62.80 percent due to increase in manpower and salary of employees. The expense has also increased due to increase in sample cost.

Changes of Inventory

There is no significant change of inventory level over the past years except for 2012-2013. This has resulted from (i) increase in the price of raw material from Tk. 168.88 to Tk. 184.52 per KG and (ii) change in company's policy for maintaining substantial quantity of stock during harvesting season to avoid the risk of price fluctuation and ensure quality.

Earnings per Share (EPS)

The Eps was consistent over the last five years.

(d) Known trends demands, commitments, events or uncertainties that is likely to have an effect on the company's business.

There are no known trends, events and/or uncertainties that shall have a material impact on the Company's future business except for those which are naturally beyond control of human being.

The business operation of the Company may be affected by the following events:

- Decrease in demand for yarn due to decrease in the global demand for readymade garments,
- Unusual increase in production cost
- Scarcity of raw materials
- Shortage in supply of gas
- Technological obsolescence
- Increased competition
- Govt. Policy change pertaining to this industry
- Political unrest
- Natural calamities etc.

(e) Trends or expected fluctuations in liquidity

There are no trends or expected fluctuations in liquidity.

(f) Off-balance sheet arrangements those have or likely to have a current or future effect on financial condition

There are no off-balance sheet arrangements those have or likely to have a current or future effect on financial condition.

CHAPTER XX: RISK FACTORS AND MANAGEMENT'S PERCEPTIONS ABOUT THE RISKS:

In the business world return and risks has reciprocal relationship. Thus, Aman Cotton Fibrous Limited would be subject to risk of a typical nature of similar Textiles Companies. The common risks are commercial and business risks that can be mitigated effectively. Before making any investment decision, Investors should take the risk factors into consideration. Such major risk factors are described in brief as under:

(I) INTERNAL RISK FACTORS MAY INCLUDE, AMONG OTHERS**(a) Credit Risk**

ACFL may be exposed to credit risk if any buyer ever fails to remit the sales proceeds due to willful default of their business failure and/ or financial crisis.

Management Perception

ACFL has a business deal with reputed customers having long standing and proven track record of timely settlement of sales Proceeds.

Moreover, we have a robust system of quality control to mitigate the risk of discrepancy in our products. It may further be mentioned that all the exports are made against L/Cs.

(b) Liquidity Risk

ACFL is exposed to liquidity risk in effect that ACFL may not be able to meet its financial obligations when they fall due. ACFL's approach to managing liquidity (cash and cash equivalents) is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due under both normal and stressed conditions without incurring unacceptable losses or jeopardizing company's reputation.

Management Perception

ACFL conducts liquidity management in a manner that maintains stability and flexibility in day-to-day funding activities. Our liquidity risk management starts by managing daily payment of cheques, daily cash inflow and outflow and our access to other funding sources as and when required. Typically, the company ensures that it has sufficient cash and cash equivalent to meet expected operational expenses including financial obligations through preparation of the cash flow forecast with due consideration of time line of payment of the financial obligation and accordingly arrange for sufficient fund to make the expected payment within due date. In extreme stressed conditions, the company may get support from the sister concerns in the form of short-term financing.

(c) Risk associated with the issuer's interest in subsidiaries, joint ventures and associates

ACFL has no subsidiary, joint ventures or associate company.

Management Perception

ACFL is not exposed to any such risk, as presently it has no subsidiary, joint ventures or associate concern.

(d) Significant revenue generated from limited number of customers, losing any one or more of which would have a material adverse effect on the issuer;

ACFL may expose to the risk of losing one or more customer(s) from which significant revenue is generated and that might have a material impact on ACFL.

Management Perception

ACFL is not depended on a limited number of customers. Knowing the consequence of potential concentration risk of depending on few customers, ACFL always keeps on its strategy of exploring new customers. Moreover, we give emphasize more on doing business with organizations having good reputation and excellent track record of long-term commitment.

(e) Dependency on a single or few suppliers of raw materials, failure of which may affect production adversely;

We may expose to risk of depending on single or few suppliers due to failure in supply of quality raw materials in a timely manner.

Management Perception

Delay in supply of substandard materials in time may adversely affect the production of ACFL. ACFL procures raw materials from different sources and constantly monitors the quality of materials and evaluates suppliers' creditability. We minimize the above risk by identifying different prospective suppliers at competitive price and ensuring the quality of raw materials.

(f) More than 20% revenue of the Company comes from sister concern or associate or subsidiary;

ACFL may be exposed to the risk of generating revenue of 20% or more from its sister concern or associate or subsidiary.

Management Perception

ACFL does not have any associate or subsidiary company. ACFL has business transaction with one of its sister concern namely Aman Tex Limited, that generates revenue of less than 20% and management perception that the limit will not exceed 20% in near future.

(g) Negative earnings, negative cash flows from operating activities, declining turnover or profitability, during last five years, if any;

ACFL may expose to this risk if it has any negative cash flow from operating activities or experience a declining turnover and profitability.

Management Perception

During the last 5 years the company had no negative earnings or negative cash flow from operating activities. Moreover, the company did not experience either any diminishing turnover or profitability during last 5 years. Likewise, Management does not perceive any such risk in coming years.

(h) Loss making associate or subsidiary or group companies of the issuer;

ACFL may expose to such risk if the group has any loss making associate or subsidiary company.

Management Perception

ACFL is a concern of Aman Group that consists of several companies. There is no subsidiary or associate company of ACFL. Currently, none of the sister concerns incurs any loss that has an adverse impact on operating results of the company. All concerns of Aman Group are managed by a group of talented professionals of long experienced professionals in their respective fields. Moreover, most of the sister concerns are financially strong enough to manage their operations and assist their weak concern if necessary in times of needs.

Management does not perceive any such indication that cause them reasonable assurance to believe that any of its sister concern may incur loss in the coming years that may require financial support from ACFL.

(i) Financial weakness and poor performance of the Company or any of its subsidiary or associates

ACFL may face such risk if any unexpected and unusual happening takes place in near future. There are certain things that can't be foreseen and even apprehend beforehand and which are absolutely beyond one's control like natural disaster or calamities, war, strike, riot, international sanction etc. Happening of such event may cause ACFL financially weak and results in poor performance.

Management Perception

ACFL has been a profitable company being managed by a group of experienced professionals. From the financial indicators it would be evident that the company has been running profitably since its inception and Management does not perceive any such event that may adversely impact the operation or financial results of the company in coming years. ACFL has also taken required measures to minimize certain risks through shifting the same to third parties like insurance company.

(j) ACFL Decline in value of any investment

ACFL may be exposed to market risk that may result in from the fluctuation in the market value of Investment in securities. When the market value of securities falls below the cost price, ACFL needs to provide required amount of provision thereby impacts the profitability of the company.

Management Perception

ACFL has an investment in the listed Securities to the tune of Tk. 64,47,506/ as on 30 June 2016. The market value of the securities as on that date was Tk. 40,80,480 as against Tk. 39,33,220 of 30 June 2015. Required provision due to fluctuation in the market price was made in the accounts in the respective accounting year as shown under Note 5.01 of the Notes to the Financial Statements. Management does not perceive that any significant loss may likely to incur from the investment in coming years as experienced portfolio manager is managing the investment. Moreover, the size of the investment is not significantly high.

(k) Risk associated with useful economic life of plant and machinery, if purchased in second hand or reconditioned

ACFL may be exposed to this risk if it ever decides to purchase secondhand or reconditioned plant and machineries.

Management Perception

Till to date ACFL did not procure any secondhand plant and machinery. All the machineries are of European and USA origin. Management does not have any intention to buy any secondhand or reconditioned plant and machineries in coming years.

(l) Adverse effect on future cash flow if interest free loan given to related party or such loans taken from directors may recall

ACFL may be exposed to this risk if sudden call is made if any loan is taken from directors and no interest is charged on loan to related party.

Management Perception

ACFL does not have any loan exposure taken from any directors of the company. ACFL, however, on rare instance make advances to its sister concern(s) to meet its short-term requirement. The Company always ensures that such advances are adjusted within the stipulated time, so that its cash flows are not affected by such transactions. The Company is, however, in the process of formulating a policy restricting any advances to any Directors and sister concerns.

(m) Potential conflict of interest, if the sponsors or directors of the issuer are involved with one or more ventures which are in the same line of activity or business as that of the Company and if any supplier of raw materials or major customer is related to the same sponsors or directors;

ACFL may encounter such risk since one of its sister concern namely Anwara Mannan Textile Mills Ltd. is engaged in similar business where four directors of ACFL out of total seven are common. In addition, another sister concern namely Aman Tex Limited having common directors is one of the major customers who purchases on an average 14-20 percent of total sales of ACFL.

Management Perception

The Management of ACFL and its Directors have always been very meticulous in complying with the necessary guidelines and other applicable rules and regulations. However, one of its sister concerns namely Anwara Mannan Textile Mills Ltd. is engaged in similar business where four directors of ACFL out of total seven are common. The Management of ACFL doesn't perceive any potential risk of conflicts, as they are not competitors of each other. And all the transactions are executed through arm's length transaction. Management is always sensitive as to the operation of the group which is being managed independently with strict compliance of business norms and ethical standards.

Moreover, one of the sister concern namely Aman Tex Limited is one of the major customers who purchases on an average 14-20 percent of total sales of ACFL. All the sales are made to Aman Tex Limited at a competitive price similar to that of other customers.

(n) Related party transactions entered into by the company those may adversely affect competitive edge;**Management Perception**

ACFL has some business transaction as disclosed under the head of related party transaction in the notes to the financial statements. Management perceives that such transactions would have no adverse effect on competitive edge.

(o) Any restrictive covenants in any shareholders' agreement, sponsors' agreement or any agreement for debt or preference shares or any restrictive covenants of banks in respect of the loanor credit limit and other banking facilities;

Management Perception

There are no restrictive covenants in any shareholders' agreement, sponsors' agreement or any agreement relating to debt or preference shares or any restrictive covenants of Banks in respect of loan or credit limit and other banking facilities and management perceives in a right way.

(p) Business operations may be adversely affected by strikes, work stoppages or increase in wage demands by employees

The operations and the operating and financial results of ACFL may be affected by strikes, work stoppages or increase in wage demands by employees.

Management Perception

ACFL is one of the leading textiles industries of the country in terms of work environment and employee satisfaction. We always prioritize our human resources over other issues, as we believe that the success of ACFL immensely depends upon the performance of its 674 patrons. With a view to going forward by retaining the talents, ACFL always offers inspiring propositions along with a classic working environment. Considering the facts, it is apparent that the risk of strikes, work stoppages or increase in wage demands by employees is remote for ACFL.

(q) Seasonality of the business of the issuer**Management Perception**

Yarn products are the basic raw material of Textiles industry in and related, Bangladesh Textiles market is considered to be more promising in coming years. So the risk of variability of company's operating results is expected to vary insignificantly over the month of a year. Hence, Management perceives that the business of ACFL is not grossly affected by the seasonality of the demand of its products and supply of raw materials.

(r) Expiry of any revenue-generating contract that may adversely affect the business**Management Perception**

ACFL has no fixed-term revenue-generating contract with any parties the expiry of which may adversely affect the business of the Company. The nature of the business of ACFL is that its production is a continuous process based on the orders from different customers under confirmed Letter of Credits and not on any fixed term contract basis. Hence, the question of affecting the business of ACFL due to expiry of revenue-generating contract does not arise.

(s) Excessive dependence on debt financing which may adversely affects the cash flow

The cash flow of ACFL may be affected adversely by the excessive reliance of debt.

Management Perception

ACFL is not excessively depended on debt. Based on the financials as on June 30, 2016, the debt to equity ratio was 0.37. As on the same date the debt service coverage ratio was 0.44. The credit rating company CRAB has also awarded 'A2' for long term and 'ST-2' for short term. 'A2' refers adequate safety for timely repayment of financial obligations and 'ST3' refers good certainty of timely payment and company liquidity factors & fundamentals are sound. We trust that our initiative to go for IPO will allow us for acquiring perpetual capital enabling ACFL to avoid over-reliance on debt financing thus improving corporate debt-equity ratio further. Management also perceives that as ACFL has been generating sufficient cash flow from operating activities, and the trend is expected to continue in the coming years, the Company would be in a stronger position in terms of settlement of its debt obligations.

(t) Excessive dependence on any key management personnel absence of whom may have adverse effect on the Company's business performance**Management Perception**

ACFL is a structured company and has been conducting its business by professionals for decades with good reputation. Succession planning is one of the key strategies of ACFL for ensuring its smooth operation. ACFL is not dependent on any key management personnel the absence of whom would adversely affect company's business performance.

(u) Enforcement of contingent liabilities, which may adversely affect financial condition

A contingent liability is where there is significant uncertainty about a number of aspects regarding the liabilities. A contingent liability arises where an event that occurred in the past may lead to the entity having a liability in the future. But the financial impact of the event will only be confirmed by the outcome of some future events not holding entity's control. ACFL is exposed to risk of having a contingent liability disclosed in the financial statements.

Management Perception

Aman Cotton Fibrous Limited has a contingent liability disclosed in the financial statements on the ground that the Company has filed appeal to the higher tax authority stating that 'learned Deputy Commissioner of Taxes disallowed certain expenses hypothetically without assigning any reason merely on surmise which was unjustified and unlawful'. To our assessment, the management is of the opinion that it is likely that the order of the Tax authority would come in favor of the Company. If for any reasons, which has remote possibility, the decision goes against the Company (partly or fully), necessary provision would be made as per para 30 of BAS 37 at the time of disposal of the order by the tax authority and the Company has the financial strength to pay the liability out of cash from operating activities.

(v) Insurance coverage not adequately protect against certain risks of damages**Management Perception**

As a part of risk management process, ACFL transfers risks through insurance for inventory, plant & machinery, building covering fire & lighting damage, Group insurance coverage for permanent employees, riot & strike damage, malicious damage, aircraft damage, explosion and impact damage. So, risk of damages is mitigated.

(w) Absence of assurance that directors will continue its engagement with Company after expiry of lock in period;**Management Perception**

All the existing directors of the Company have given their consent to serve the Company after the expiry of lock-in period.

(x) Ability to pay any dividends in future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditure**Management Perception**

The Company's net profit after tax and other business performance indicators show increasing trend due to the Management dedication and strategic action to face competition and challenges in the industry for sustainable growth.

Strong financial performance for successive years is the result of unwavering commitment of the promoters, management efficiency, employees' sincerity, use of appropriate technology. Over the years company's financial performance is improving due to visionary outlook, experienced and skilled top tier management, favorable economic and Government rules and regulations, and commendable repayment

culture is contributing for growth of the Company. The Company has a robust financial management practices. Besides, as at 30 June Company's retained earnings stood at Tk. 178,69,49,775/- as shown in the Prospectus under business strategies and future plan that the company's net profit after tax for the next three accounting years would be positive.

(y) History of non operation, if any and short operational history of the issuer and lack of adequate background and experience of the sponsors

Management Perception

Since the beginning of its operation in 2007, ACFL has no history of non-operation. The company is running by a professional team and its sponsors have adequate business background and experience, which reduce the non-operating risk.

(z) Risks related to engagement in new type of business, if any

Management Perception

ACFL has no plan to engage in new type of business in near future.

(aa) Risk in investing the securities being offered with comparison to other available investment options; Management Perception

Like other securities, the share price of ACFL may be affected by manifold factors. Management perceives that the investors in the shares of ACFL would get better return than that of other available investment options.

(bb) Any penalty or action taken by any regulatory authorities for non-compliance with provisions of any law

Management Perception

There is no record of any penalty or action taken against the Company by any regulatory authorities for non-compliance with provisions of any law except mentioned in the Chapter : Outstanding Litigations, Fine or Penalty.

(cc) Litigations against the issuer for Tax and VAT related matters and other government claims, along with the disclosures of amount, period for which such demands or claims are outstanding, financial implications and the status of the case;

ACFL may be exposed to this risk if any decision goes against the Company relating to any law suit, Tax, VAT, or any other Government claims.

Management Perception

The Company does not have any litigation except the dispute with the Tax Authority i.e., there was an income tax demand relating to the Assessment Year: 2012-2013 and 2013-2014 for Tk.2,61,63,690/- and Tk.5,35,3,617/- respectively against which Appeal is pending with the Tax Authority. It is expected that the appeal order would come in favour of the Company. In this regard, a disclosure about contingent liability has been made in the financial statements on the ground that the Company has filed appeal to the higher tax authority stating that 'learned Deputy Commissioner of Taxes disallowed certain expenses hypothetically without assigning any reason merely on surmise which was unjustified and unlawful'

(dd) Registered office or factory building or place of operation is not owned by the issuer

Management Perception

ACFL has its own registered office and factory building. So, management do not perceive any vulnerability that usually arise due to requirement for shifting of rented factory or offices.

(ee) Lack of renewal of existing regulatory permissions/licenses Management Perception

A dedicated team supervises the renewal processes for all the regularity permission/licenses and renewals. So, risk due to lapses in the validity of renewal of licenses from concerned regulatory authorities.

(ff) Failure in holding AGM or declaring dividend or payment of interest by any listed securities of the Company or any of its subsidiaries or associates

Management Perception

Currently, ACFL has no listed securities and it has no subsidiary or associate. However, the ordinary shares of one of its sister concern namely Aman Feed Limited are listed with Dhaka and Chittagong Stock Exchange. There is no record of failure in holding AGM or declaring dividend of that listed company. Last year the listed company declared 30 percent dividend including 10 percent stock dividend. Management is in the firm believed that the Company will set a good track record in terms of payment of dividend.

(gg) Issuances of securities at lower than the IPO offer price within one year

Management Perception

ACFL has no plan to issue any securities at a price lower than that of the IPO price within one year of IPO.

(hh) Refusal of application for public issue of any securities of the issuer or any of its subsidiaries or associates at any time by the Commission.

Management Perception

ACFL has no subsidiary or associates. ACFL has no experience of refusal of application for public issue of any securities at any time by the Commission.

(ii) Delay in the execution of Projects as per original plan

The execution of the project may be delayed due to delay in receiving the IPO proceeds. This may happen due to reasons beyond Company's control.

Management Perception

Management does not perceive that there will be any delay in the process of execution of the projects as planned. If for any reason the projects get delayed in execution due to delay in getting IPO proceeds, Management may go for raising fund from alternative options for temporary period including bank loan to ensure timely completion of the project in order to avoid cost escalation. And as soon as the IPO proceeds is available all the debts incurred due to delay in getting IPO proceeds will be settled immediately.

EXTERNAL RISK FACTORS**(a) Interest rate risks**

Interest rate risk is the risk that Company faces due to unfavorable movement in the interest rates. Changes in the government's monetary policy, along with increased demand for loans/investments tend to increase the interest rates. Such rises in interest rates mostly affect Companies having floating rate loans or Companies investing in debt securities.

Management Perception

In order to manage this risk and overcome it, the Company shall exercise prudence in its cash flow management, supported by continued strength in sales and marketing. ACFL is very careful in forecasting the prices of raw materials and manages its costs in an effective manner. To maintain effective rate of return ACFL also follow knowledge and information based products mix, so as to ensure that the debt repayments are met on schedule, even if the interest rates goes up.

(b) Exchange rate risks

Exchange rate risk occurs due to changes in foreign currency exchange rates. As the Company has taken foreign currency loan, imports major raw materials and some packing materials from abroad and earns most of the revenue in local currency, unfavorable volatility or fluctuation may affect the profitability of the Company. On the other hand, if exchange rate decreased against local currency opportunity will be created for generating more profit.

Management Perception

ACFL earns most of its revenue in US dollars, thereby creating in built hedging scopes. Besides, in case of significant BDT devaluation in order to keep the cost to minimum, appropriate and responsible hedging mechanisms may be applied. However, if the price of the US dollar appreciates too sharply against the BDT, this will be a nationwide phenomenon experienced by the entire industry. In such a scenario, there will be a market adjustment in end product prices. Management perceives that for the greater interest of the Company, the Government shall continue the policy of managing the currency conversion rate stable in terms US Dollar in the coming days as of the Past.

(c) Industry risks

The company's major raw material is Raw Cotton. Currently, it completely depends on external vendors for procurement of Raw Cotton. As price of yarn largely depends on production of raw cotton which in turn is dependent upon environmental conditions, company's cash flows and profitability might adversely be affected at any point of time.

Management Perception

Price volatility of cotton and yarn in international market is a common phenomenon, which affects, more or less, all operators belonging to this particular industry segment. So, the nature of relative competency is expected to remain the same. However, ACFL management is always watchful about timely Raw Cotton procurement from both domestic and foreign markets. The history of efficient Raw Cotton procurement establishes the superior sourcing ability of the management. Moreover, management maintains a significant stock of raw materials during season to address the risk of unusual rise in the price of the same during off-season.

(d) Economic and political risks

Bangladesh is prone to serious unrest in the political condition which produces Hartal, Road-Block and many other barriers to the business. This could also propel the cost of the product upwards.

Management Perception

Although the country has passed a political turmoil until the end of 2014, a sound political atmosphere is prevailing from early 2015, which is expected to continue in future. Both the ruling and opposition parties are committed to the betterment of the country. Management doesn't, however, perceive any significant political turmoil that may have significant and adverse effect of Company's operations.

(e) Market and technology-related risks**Market demand**

Almost entire revenue of the company is earned through export of Cotton Yarn. Therefore, fall of price and/or demand in international market may adversely affect the profitability of the company, and thereby the value of shares. Additionally, loss of competitive advantage may negatively impact the earning ability of the company. Diversifying the export markets and building strong brand equity will enable the company to grow and withstanding the market risk.

Management Perception

Although currently almost 95% of its total exports go to Europe and residual 5% to USA, the company is focusing on other overseas markets with a view to expanding its business horizon following business diversification strategy that would help minimizing volatility in achieving targeted sales.

ACFL has been using brand new European and USA machinery with latest technology. As a result buyers of ACFL enjoys longstanding belongingness and it is expected that this machinery would render equivalent services for another 20 years without any major disruption.

Risk from change in competitive dynamics

The company may face competition from some renowned and strong competitors like A & A Textiles Ltd., Delta Spinning Mills Ltd, and Maksons Spinning Mills Limited etc. in domestic arena. In addition to that, entrance of new entity might put price pressure and cause a shrink in market share in future.

Management Perception

There is a large demand-supply gap for the product of Cotton Yarn both in local and international markets. Being one of the high quality Cotton Yarn producers in the country, ACFL is capable of making full use of the opportunities. The company is comfortably operating for its well-thought-out arrangement of good quality machineries, as well as sound product demand from its customers.

Technology Related Risk

Technology always plays a vital role for any business for ensuring better product quality, for providing better services to the customers and for minimizing costs. Textile is a technology dependent industry and continuous technological improvement is an integral part of this business. Obsolete technology or machineries will make it difficult for any textile company to sustain in such a competitive industry.

Management Perception

As the machinery of the company is very sophisticated and state-of-the art, it is expected that there is very low probability of sudden obsolescence of technology in the near future. Majority of its machinery is imported from globally renowned manufacturers from European countries and USA. Furthermore, the company will be constantly adding new machinery from similar countries in its factory for maintaining its production quality and volume.

(f) Potential or Existing Government Regulations

The company conducts its business under the Companies Act, 1994, different fiscal policies, Rule and Regulations of Bangladesh Security and Exchange Commission and other regulatory authorities. The existing Government rules and regulations are favorable for the Company. Any abrupt changes in the policies may adversely affect the profitability and the operation of the Company.

Management Perception

RMG export is a vital sector for the growth of the economy of Bangladesh. Government incentives and subsidies are crucial to maintain the sustainability and growth of this sector. The Government is aware of this fact. Hence, it is rationally expected that any undue tax or duty will not be imposed that may adversely affect the sector's sustainability. Rather, the Government is keen to support the industry. Finally, any changes in VAT, tax, or duty structure will affect all the operators in the industry. However, ACFL has the greater resistance ability due to its cost-efficient operation process.

(g) Potential or existing Changes in Global and National Policies

Changes in the existing global or national policies can have either positive or negative impact on the Company's profitability. The performance of the Company may be affected due to unavoidable circumstances in Bangladesh, as such any structural change in textile industry, war, terrorism, political unrest, natural and man-made disasters which may adversely affect the economy in general.

Management Perception

As a least developed country, Bangladesh enjoys GSP facilities from EU countries. Withdrawal of this facility in the near future is least likely. The organization's management is always conscious about full compliance of the buyer specific requirements on a continuous basis. The company is striving to diversify its international client base through greater marketing initiatives. This will provide the company with greater sustainability against changes in buyer specific policy changes.

(h) Statutory clearances and approvals those are yet to be received by the issuer**Management Perception**

The company has collected all the statutory clearance and approval to operate the business. The necessary update and renewal is a continuous process. Hence, there is a limited degree of such risk associated with the company.

(i) Competitive condition of the business

ACFL is operating in a free market economy regime. The company might have to face stiff competition from its competitors. Easily availability of global products in the local markets adds to the competition, challenging the profitability of the business.

Management Perception

Bangladesh is the prime source of cheapest labor in the world, gaining comparative advantages for its industries over their global competitors. Other overhead costs are also low in Bangladesh. As a result, the company has been able to maintain its cost of products most competitive. Moreover, over the last few years the company has built a trustworthy relationship with its customers, which helps the company avoid competition with others.

(j) Complementary and supplementary products or services which may have an impact on business of the issuer;**Management Perception**

The company has not faced any challenges relating to supplementary and complementary products and Management is always concerned with these issues. In future, if necessary, Management may diversify its products to take the competitive advantage over the competitors.

Other risk factors:**a) Risk related to acting as backward linkage to sister concern**

ACFL is exposed to the risk of acting as backward linkage to its sister concern. In case, when the sister concern fails to pay its obligation the company's business may adversely be affected.

Management Perception

ACFL sells more than 80 percent to third parties those are 100% export-oriented garment industries. ACFL also sells its products to its sister concern against back to back L/C and hence the payment is guaranteed. Moreover, the demand of ACFL's products is high in the market where it operates and is well diversified. Selling of such small quantity of its products to third parties would not be difficult. So management does not perceive any significant risk that may result from selling of its products to sister concern.

b) Risk related to establishment of expansion project.

If the implementation of expansion project is delayed then targeted sales may be hampered accordingly profitability may be reduced.

Management Perception

ACFL has already started its expansion project. ACFL has the strong support from its group concern. The prospective business and profitability of ACFL is also growing. This risk will be mitigated by the short term finance from lenders.

c) Risk related to advance against land purchase

ACFL is exposed to this risk if the seller declines to hand over the land to ACFL or demands a higher price considering the present market value.

Management Perception

Since the transaction has been executed through a registered Bainanama and the land is within the possession of ACFL over which some construction works have been completed, the risk of non-delivery of land or claiming a higher price is remote. Moreover, since the deal is going to happen within the related parties, there is a remote possibility that the seller will demand a higher price because it will tarnish the image of the group.

d) Risk related to not provisioning against appeal made to the Income Tax Authority for Tk. 79,697,307/-

ACFL is exposed to this risk that ACFL made no provision against appeal made to the Income Tax Authority for Tk. 79,697,307/-. In case, the verdict goes against the company, how the liabilities will be met by ACFL.

Management Perception

Aman Cotton Fibrous Limited had disclosed the event as contingent liability instead of providing provision in the financial statements on the ground that the Company has filed appeal to the higher tax authority stating that 'learned Deputy Commissioner of Taxes disallowed certain expenses hypothetically without accepting bills, vouchers and audited accounts which was unjustified and unlawful'. To our assessment, we are of the opinion that it is likely that the order of the Tax authority would come in favor of the Company and hence no provision has been made in the accounts and thereby disclosed as contingent liability. If for any reasons, which has remote possibility, the decision goes against the Company (partly or fully), necessary provision would be made as per para 30 of BAS 37 at the time of disposal of the order by the tax authority and the Company has the financial strength to pay the liability out of cash from operating activities.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Bangladesh Financial Reporting Standards (BFRS)/ Bangladesh Accounting Standards, The Companies Act 1994, The Securities and Exchange Rules 1987 and other applicable laws and Regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement whether due to fraud or error.

Auditors' Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Bangladesh Standards on Auditing (BSA). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements prepared in accordance with the Bangladesh Accounting Standards (BAS), Bangladesh Financial Reporting Standards (BFRS) present fairly in all material respects the financial position of the company as at 30 June 2016 and the result of its operation and its cash flows for the year then ended and comply with the Companies Act 1994, The Securities and Exchange Rules 1987 and other applicable laws and regulations.

Note:

The stand-alone ratio of the Aman Cotton Fibrous Ltd have been calculated based on Audited Financial Statements and Industry average ratios are calculated on the basis of financial data collected from Annual Report of following four publicly traded Companies corresponding accounting years:

Sl No.	Name of The Company	Considered Accounting Years	Remarks
1	Maksons Spining Mills Ltd	For the Year ended June 30, 2012, 2013, 2014, 2015 & 2016	
2	Malek Spining Mills Ltd	For the Year ended June 30, 2012, 2013, 2014, 2015 & 2016	
3	Metro Spining Ltd	For the Year ended June 30, 2012, 2013, 2014, 2015 & 2016	
4	Matin Spining Mills Ltd	For the Year ended June 30, 2012, 2013, 2014, 2015 & 2016	

Analysis:

Industry average ratios have been calculated taking into account the financials of four peer companies listed with stock exchanges as mentioned above. It is to be mentioned that most of the spinning companies are not listed with stock exchanges and thus we have taken the reference value of the above listed companies only. From the calculated ratios, it is observed that most of the ratios of ACFL are favorable reflecting strong financial position.

The above ratios reveal that ACFL has been consistently maintaining satisfactory ratios over the periods with little exception of accounts receivable turnover and inventory turnover ratios.

The company had to change its storage policy for raw materials in the year 2013, resulted from substantial upward move in the price of raw materials in the international market. In order to minimize the fluctuation risk, we are to maintain a significant level of stock for raw cotton for the whole year production mostly purchase during the season i.e. during February to July each year in order (i) to keep the cost of materials at a minimum level; (ii) to ensure its quality; and (iii) undisrupted production. So it maintains buffer stock and now it is within the capacity.

Although the accounts receivable ratio is comparatively high but a substantial part of it has been received. It is to be mentioned here that ACFL sells its products to the buyer against deferred L/C ranging from 90-180 days that results in higher receivables in that case, ACFL usually gets higher price and thus better off. As a result sales and credit ratio is comparatively high.

In addition current year's higher Net Operating Cash Flow Per Share and Net Operating Cash Flow to EPS resulted from the realization of advances earlier paid for purchases as well as reduction in inventory.

PROFILE

Aman Cotton Fibrous Limited (ACFL), a concern of Aman group, is a cotton yarn manufacturer promoted by a group of sponsors in the year 2005; which offers a wide range of cotton yarn made out of imported cotton from various countries. The Company commenced commercial production in November 2007 with capacity of 30,960 spindles capable of producing 6,780MT of yarn per year. The counts of cotton yarn range from 20"s to 40"s with the average count being 24"s to 30"s depending on the demand in the market. The promoter and his family hold the major portion of shares of the Company.

RATIONALE

Credit Rating Agency of Bangladesh Limited (CRAB) has reaffirmed the long-term rating of Aman Cotton Fibrous Ltd (hereinafter referred to as ACFL or the Company) at

A₂ (pronounced **Single 'A' Two**) and **A₂ (Lr)** rating of BDT 94.5 million aggregate Long Term Outstanding and BDT 20.0 million CC (Hypo) in the Long Term. CRAB has also retained **ST-2** rating of BDT 2,370.0 million aggregate fund and non fund based limits in the Short Term availed by the Company.

Credit Strengths

1. Positive Sales growth, stable financial position observed;
2. Established market position, stable customer profile, good product quality, tag with captive consumption of yarn reflect continuous capacity utilization of average 96.0% in last six years.
3. Continuing financial and operational flexibility of the Company arising from Aman group; experience of promoter in various industries;
4. Continuing business with diversified product range (across count ranges) is likely to insulate from decline in demand from any specific segment to an extent; moderate value addition facilities expected to provide relatively higher realization/margin.

Credit Concerns

5. Decreasing trend of yarn price, managing positive sales growth through increasing quantity;
6. Continuing high working capital intensity having very high CCC given the seasonal nature of cotton availability;
7. Although leverage position of the Company slightly improved in this surveillance period, borrowed fund of the Company is still above 2 times of its EBITDA;
8. Continuing earning vulnerability of the textile industry to exchange rates and cotton price fluctuations; fragmented industry structure with intense competition from both local and foreign company.

The assigned ratings of Aman Cotton Fibrous Ltd in this surveillance period positively factors in Company's positive sales growth after FY12 and stable financial position, having net profit margin stable to 16% in last two years, maintaining positive operating cash flow, strong equity base of BDT 3,129.3 million with improving debt to equity ratio, and satisfactory level of coverage position. Continuing financial and operational flexibility enjoyed by ACFL by virtue of being a part of the Aman Group which helped the Company survive from the volatility of world cotton and local yarn market continued in last few years; significant experience of the promoters in the textile, and other businesses; and benefits of having balanced presence across count ranges, captive yarn consumption, and maintaining capacity utilization on average of 96.0% in last six years; and good relation with the financing banks are also considered when the ratings of the Company derives.

The assigned ratings of the Company in this surveillance period are however constrained by decreasing trend of average selling price or yarn since FY12 and managing sales growth through increasing quantity. The outlook of the industry directly correlated with export orders received by the end users. The recessionary global outlook even though will be persistent, costly labor and production cost of competitive countries will move forward of the textile industry. Company's long presence in textile industry and management strength has led to reduced volatility in earnings in the past. Considering borrowed fund to EBITDA, Company's borrowed fund was still above 2 times than its EBITDA. Cash Conversion Cycle of the Company was above 400 days in last few years due to high inventory processing period and receivable collection period. The Company should address those issues going forward.

■ BACKGROUND

Aman Cotton Fibrous Limited (ACFL) emerged with commitment for meeting the requirement of manufacturing and supplying high quality cotton yarn with the finance from Islami Bank Bangladesh Ltd. The Company is a public limited and is a concern of AMAN GROUP. The production of ACFL was started from November 2007 with an installed capacity of 30,960 spindles capable of producing 6,780.0MT of yarn per year. The mill is situated in the village of Boiragirchala in Sreepur Upazilla of Gazipur district. Subsequently the shareholders in its EGM held on 22 April 2012 approved the conversion of the status of the Company from private Limited to Public Limited Company.

■ OPERATION, BUSINESS & FINANCIAL RISK PROFILE

Operation	Industry/Market	The business model and competitive position of the Company in last few years is unchanged. After starting of its commercial operation in November 2007, the Company has already established presence in the cotton yarn market of the Country on the back of long-standing relationships with clientele through its diversified product range and product quality in last one decade. There were few changes in top 10 buyers of the Company in FY17 (3 changes), but they still contributed around 60% of total sales of the Company in the same period (around 65% in FY16). With below moderate customer concentration, 16.3% of its sales are made by the sister concern, which ensures revenues and stable production capacity utilization even during the slowdown, mitigates the risk to some extent.

	ACFL has a wide product range diversified across cotton yarn, with the ability to manufacture count range from 20's to fine 40's. The Company fully concentrates on					

	<p>the medium counts (24"s~30"s), with major part of revenue coming from those counts that are largely marketed to the deemed export market. The Company imported cotton mostly from Uzbekistan, USA, etc cotton export countries. This, coupled with effective cotton mixing (Card, combed) ensures higher quality of yarn, helping the Company attract premium pricing in the market. The present count range provides stability to volumes, especially with the recent volatility in the demand for yarn.</p> <p>Table 2</p> <table border="1"> <thead> <tr> <th colspan="3">Yarn Sales History FY17</th> </tr> <tr> <th>Month</th> <th>Amount BDT million</th> <th>Quantity (MT)</th> </tr> </thead> <tbody> <tr><td>July-'16</td><td>140.5</td><td>436.0</td></tr> <tr><td>August-'16</td><td>125.6</td><td>499.0</td></tr> <tr><td>Sep-'16</td><td>141.3</td><td>559.0</td></tr> <tr><td>Oct-'16</td><td>145.3</td><td>572.0</td></tr> <tr><td>Nov-'16</td><td>123.3</td><td>498.0</td></tr> <tr><td>Dec-'16</td><td>110.5</td><td>459.0</td></tr> <tr><td>Jan-'17</td><td>111.3</td><td>495.0</td></tr> <tr><td>Feb-'17</td><td>152.3</td><td>590.0</td></tr> <tr><td>Mar-'17</td><td>165.3</td><td>595.0</td></tr> <tr><td>Apr-'17</td><td>169.0</td><td>610.0</td></tr> <tr><td>May-'17</td><td>160.9</td><td>630.0</td></tr> <tr><td>Jun-'17</td><td>189.3</td><td>680.0</td></tr> <tr><td>Total</td><td>1,734.3</td><td>6,723.0</td></tr> </tbody> </table> <p>World market Cotton price in July 2016~June 2017 shows upward trend at later part of the year reached highest USD 1.95/Kg in May 2017 to lowest USD 1.72/Kg in September 2016. Negative sales growth of the Company was continued up to FY16 from FY13, due to low yarn price for low cotton price, and dollar devaluation. Relatively cheaper price of polyester yarn in the market is also liable for low demand of cotton yarn to some extent. However, the production of the Company was not affected as much as most other spinning mills of the country because the Company has diversified product, captive consumption by Group's textile mills, and strong support from the Group in which the Company exists. Recently, the top management of the Company also thinks for introducing new product, specialized yarn, which will further increase Company's competitive strength in the market.</p> <p>Table 4 Profitability Ratios</p> <table border="1"> <thead> <tr> <th rowspan="2"></th> <th rowspan="2">Month</th> <th colspan="6">Year ended June 30</th> </tr> <tr> <th>(12)</th> <th>(12)</th> <th>(12)</th> <th>(12)</th> <th>(12)</th> <th>(12)</th> </tr> <tr> <th>(%)</th> <th></th> <th>2017</th> <th>2016</th> <th>2015</th> <th>2014</th> <th>2013</th> <th>2012</th> </tr> </thead> <tbody> <tr> <td>Gross Profit Margin</td> <td></td> <td>25.5</td> <td>25.6</td> <td>25.3</td> <td>25.1</td> <td>25.0</td> <td>24.9</td> </tr> <tr> <td>EBITDA Margin</td> <td></td> <td>26.9</td> <td>27.1</td> <td>27.1</td> <td>27.2</td> <td>28.4</td> <td>33.2</td> </tr> <tr> <td>Net Profit Margin</td> <td></td> <td>16.0</td> <td>16.0</td> <td>15.0</td> <td>15.0</td> <td>14.7</td> <td>15.2</td> </tr> <tr> <td>Return on Average Asset</td> <td></td> <td>6.6</td> <td>6.8</td> <td>6.8</td> <td>8.3</td> <td>9.5</td> <td>11.6</td> </tr> <tr> <td>Return on Average Equity</td> <td></td> <td>9.3</td> <td>10.0</td> <td>10.6</td> <td>13.8</td> <td>16.6</td> <td>23.1</td> </tr> </tbody> </table> <p>Profitability ratios of ACFL seem satisfactory and show a steady trend in last few years. The Liquidity ratios of ACFL seem to be following a steady trend putting the Company in a satisfactory position having current ratio was average above two times in last three years. Adjusted Operating Cash Flow (CFO) of the Company is also found positive since FY11. However, Company's working capital intensity is very high due to high inventories days because of storing of raw materials and high receivable collection days due to high competition. However, day's receivable of the Company was slightly improved in FY16 and FY17 and day's payable has also decreased in the same period, indicating that the Company is able to pay the creditors in a short span of time. The ultimate end result is high CCC, reached to 432 days in FY17 from 444 days in FY16. In FY11, such CCC of the Company was 296 days.

ACFL enjoyed working capital limit (LC/Bills/MPI/Bai Murabaha/BG/MDB) of BDT 2,390.0 million from 3 financial institutions. As of 15 December 2017, outstanding amount was in total BDT 1,276.0 million; left around 46.6% unutilized reflected it's quite relaxing liquidity position as well.

CRAB RATING SCALES AND DEFINITIONS –Long Term (Corporate)

Long Term Rating	Definition
AAA Triple A	Companies rated in this category have extremely strong capacity to meet financial commitments. These companies are judged to be of the highest quality, with minimal credit risk.
AA₁, AA₂, AA₃* Double A	Companies rated in this category have very strong capacity to meet financial commitments. These companies are judged to be of very high quality, subject to very low credit risk.
A₁, A₂, A₃ Single A	Companies rated in this category have strong capacity to meet financial commitments, but are susceptible to the adverse effects of changes in circumstances and economic conditions. These companies are judged to be of high quality, subject to low credit risk.
BBB₁, BBB₂, BBB₃ Triple B	Companies rated in this category have adequate capacity to meet financial commitments but more susceptible to adverse economic conditions or changing circumstances. These companies are subject to moderate credit risk. Such companies possess certain speculative characteristics.
BB₁, BB₂, BB₃ Double B	Companies rated in this category have inadequate capacity to meet financial commitments. Have major ongoing uncertainties and exposure to adverse business, financial, or economic conditions. These companies have speculative elements, subject to substantial credit risk.
B₁, B₂, B₃ Single B	Companies rated in this category have weak capacity to meet financial commitments. These companies have speculative elements, subject to high credit risk.
CCC₁, CCC₂, CCC₃ Triple C	Companies rated in this category have very weak capacity to meet financial obligations. These companies have very weak standing and are subject to very high credit risk.
CC Double C	Companies rated in this category have extremely weak capacity to meet financial obligations. These companies are highly speculative and are likely in, or very near, default, with some prospect of recovery of principal and interest.
C Single C	Companies rated in this category are highly vulnerable to non-payment, have payment arrearages allowed by the terms of the documents, or subject of bankruptcy petition, but have not experienced a payment default. Payments may have been suspended in accordance with the instrument's terms. These companies are typically in default, with little prospect for recovery of principal or interest.
D (Default)	D rating will also be used upon the filing of a bankruptcy petition or similar action if payments on an obligation are jeopardized.

***Note:** CRAB appends numerical modifiers 1, 2, and 3 to each generic rating classification from AA through CCC. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

LONG-TERM RATING: LOANS/FACILITIES FROM BANKS/FIS
(All loans/facilities with original maturity exceeding one year)

RATINGS	DEFINITION
AAA (Lr) (Triple A) Highest Safety	Loans/facilities rated AAA (Lr) are judged to offer the highest degree of safety, with regard to timely payment of financial obligations. Any adverse changes in circumstances are unlikely to affect the payments on the loan facility.
AA (Lr)* (Double A) High Safety	Loans/facilities rated AA (Lr) are judged to offer a high degree of safety, with regard to timely payment of financial obligations. They differ only marginally in safety from AAA (Lr) rated facilities.
A (Lr) Adequate Safety	Loans/facilities rated A (Lr) are judged to offer an adequate degree of safety, with regard to timely payment of financial obligations. However, changes in circumstances can adversely affect such issues more than those in the higher rating categories.
BBB (Lr) (Triple B) Moderate Safety	Loans/facilities rated BBB (Lr) are judged to offer moderate safety, with regard to timely payment of financial obligations for the present; however, changing circumstances are more likely to lead to a weakened capacity to pay interest and repay principal than for issues in higher rating categories.
BB (Lr) (Double B) Inadequate Safety	Loans/facilities rated BB (Lr) are judged to carry inadequate safety, with regard to timely payment of financial obligations; they are less likely to default in the immediate future than instruments in lower rating categories, but an adverse change in circumstances could lead to inadequate capacity to make payment on financial obligations.
B (Lr) High Risk	Loans/facilities rated B (Lr) are judged to have high risk of default; while currently financial obligations are met, adverse business or economic conditions would lead to lack of ability or willingness to pay interest or principal.
CCC (Lr) Very High Risk	Loans/facilities rated CCC (Lr) are judged to have factors present that make them very highly vulnerable to default; timely payment of financial obligations is possible only if favorable circumstances continue.
CC (Lr) Extremely High Risk	Loans/facilities rated CC (Lr) are judged to be extremely vulnerable to default; timely payment of financial obligations is possible only through external support.
C (Lr) Near to Default	Loans/facilities rated C (Lr) are currently highly vulnerable to non-payment, having obligations with payment arrearages allowed by the terms of the documents, or obligations that are subject of a bankruptcy petition or similar action but have not experienced a payment default. C is typically in default, with little prospect for recovery of principal or interest. C (Lr) are typically in default, with little prospect for recovery of principal or interest.
D (Lr) Default	Loans/facilities rated D (Lr) are in default or are expected to default on scheduled payment dates.

**Note: CRAB appends numerical modifiers 1, 2, and 3 to each generic rating classification from AA through CCC. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.*

SHORT-TERM CREDIT RATING: LOANS/FACILITIES OF BANKS/FIS
(All loans/facilities with original maturity within one year)

	DEFINITION
ST-1 Highest Grade	This rating indicates that the degree of safety regarding timely payment on the loans/facilities is very strong.
ST-2 High Grade	This rating indicates that the degree of safety regarding timely payment on the loans/facilities is strong; however, the relative degree of safety is lower than that for issues rated higher.
ST-3 Adequate Grade	This rating indicates that the degree of safety regarding timely payment on the loans/facilities is adequate; however, the issues are more vulnerable to the adverse effects of changing circumstances than issues rated in the two higher categories.
ST-4 Marginal	This rating indicates that the degree of safety regarding timely payment on the loans/facilities is marginal; and the issues are quite vulnerable to the adverse effects of changing circumstances.
ST-5 Inadequate Grade	This rating indicates that the degree of safety regarding timely payment on the loans/facilities is minimal, and it is likely to be adversely affected by short-term adversity or less favorable conditions.

 - d) post the amount separately in the customer account (other than NRB and Foreign applicants), and upon availability of fund, block the amount equivalent to the application money;
 - e) accumulate all the application/buy instructions received up to the cut-off date, deposit the amount in the **"Public Issue Application Account"** maintained with its bank within the first banking hour of next working day of the cut-off date;
 - f) Instruct the banker to block the account for an amount equivalent to the aggregate application money and to issue a certificate in this regard

4. Banker of the Stockbroker/Merchant Banker shall block the account as requested for, issue a certificate confirming the same and handover it to the respective Stockbroker/Merchant Banker.
5. For Non-resident Bangladeshi (NRB) and Foreign applicants, the Stockbroker/Merchant Banker shall prepare a list containing the draft information against the respective applicant's particulars.
6. The Stockbroker/Merchant Banker shall prepare category wise lists of the applicants containing Customer ID, Name, BO Account Number and Number of Securities applied for, and **within 03 (three) working days** from the cut-off date, send to the respective Exchange, the lists of applicants in electronic (text format with tilde '~' separator) format, the certificate(s) issued by its banker, the drafts received from Non-resident Bangladeshi (NRB) and Foreign applicants and a copy of the list containing the draft information.
7. **On the next working day**, the Exchanges shall provide the Issuer with the information received from the Stockbroker/Merchant Bankers, the drafts submitted by Non-resident Bangladeshi (NRB) and Foreign applicants and the list containing the draft information. Exchanges shall verify and preserve the bankers' certificates in their custody.
8. The application/buy instructions shall be preserved by the Stockbroker/Merchant Bankers up to 6 months from listing of the securities with exchange.

Step-3 (Issuer)

9. The Issuer shall prepare consolidated list of the applications and send the applicants' BOIDs in electronic (text) format in a CDROM to CDBL for verification. The Issuer shall post the consolidated list of applicants on its website and websites of the Exchanges. CDBL shall verify the BOIDs as to whether the BO accounts of the applicants are active or not.
10. **On the next working day**, CDBL shall provide the Issuer with an updated database of the applicants containing BO Account Number, Name, Addresses, Parents' Name, Joint Account and Bank Account information along with the verification report.
11. After receiving verification report and information from CDBL, the Issuer shall scrutinize the applications, prepare category wise consolidated lists of valid and invalid applications and submit report of final status of subscription to the Commission and the Exchanges **within 10 (ten) working days** from the date of receiving information from the Exchanges.
12. The Issuer and the issue manager shall conduct category wise lottery with the valid applications **within 03 (three) working days** from the date of reporting to the Commission and the Exchanges, if do not receive any observation from the Commission or the Exchanges.
13. The Issuer and issue manager shall arrange posting the lottery result on their websites within **06 (six) hours** and on the websites of the Commission and Exchanges within **12 (twelve) hours** of lottery.
14. Within **02 (two) working days** of conducting lottery, the Issuer shall:
 - e) send category wise lists of the successful and unsuccessful applicants in electronic (text format with tilde '~' separator) format to the respective Exchange.
 - f) send category wise lists of unsuccessful applicants who are subject to penal provisions as per conditions of the Consent Letter issued by the Commission in electronic (text format with tilde '~' separator) format to the Commission and Exchanges mentioning the penalty amount against each applicant.

- g) issue allotment letters in the names of successful applicants in electronic format with digital signatures and send those to respective Exchange in electronic form.
- h) send consolidated allotment data (BOID and number of securities) in electronic text format in a CDROM to CDBL to credit the allotted shares to the respective BO accounts.

Step-4 (Intermediary)

15. **On the next working day**, Exchanges shall distribute the information and allotment letters to the Stockbroker/Merchant Bankers concerned in electronic format and instruct them to:
 - c) remit the amount of successful (other than NRB and Foreign) applicants to the Issuer's respective Escrow Account opened for subscription purpose, and unblock the amount of unsuccessful applicants;
 - d) send the penalty amount of other than NRB and Foreign applicants who are subject to penal provisions to the Issuer's respective Escrow Accounts along with a list and unblock the balance application money;
16. **On the next working day** of receiving the documents from the Exchanges, the Stockbrokers/Merchant Banker shall request its banker to:
 - c) release the amount blocked for unsuccessful (other than NRB and foreign) applicants;
 - d) remit the aggregate amount of successful applicants and the penalty amount of unsuccessful applicants (other than NRB and foreign) who are subject to penal provisions to the respective 'Escrow' accounts of the Issuer opened for subscription purpose.
17. **On the next working day** of receiving request from the Stockbrokers/Merchant Bankers, their bankers shall unblock the amount blocked in the account(s) and remit the amount as requested for to the Issuer's 'Escrow' account.
18. **Simultaneously**, the stockbrokers/Merchant Bankers shall release the application money blocked in the customer accounts; inform the successful applicants about allotment of securities and the unsuccessful applicants about releasing their blocked amounts and send documents to the Exchange evidencing details of the remittances made to the respective 'Escrow' accounts of the Issuer. The unblocked amounts of unsuccessful applicants shall be placed as per their instructions. The Stockbroker/Merchant Banker shall be entitled to recover the withdrawal charges, if any, from the applicant who wants to withdraw the application money, up to an amount of Tk.5.00 (five) per withdrawal.
19. All drafts submitted by NRB or Foreign applicants shall be deposited in the Issuer's respective 'Escrow' accounts and refund shall be made by the Issuer by refund warrants through concerned stockbroker or merchant banker or transfer to the applicant's bank account (**FC account which has been debited to apply by NRB or foreign applicants**) through banking channel within 10 (ten) working days from the date of lottery.

Miscellaneous:

20. The Issuer, Issue Manager(s), Stockbrokers and Merchant Bankers shall ensure compliance of the above.
21. The bank drafts (FDD) shall be issued considering TT Clean exchange rate of Sonali Bank Ltd. on the date of publication of abridged version of Prospectus.
22. Amount deposited and blocked in the "Public Issue Application Account" shall not be withdrawn or transferred during the blocking period. Amount deposited by the applicants shall not be used by the Stockbrokers/Merchant Bankers for any purpose other than public issue application.

CHAPTER XXIX: OTHERS**Auditors' additional disclosures required to submit and incorporated in the prospectus:**

It appears from note 2.06 to the financial statements for the year ended on June 30, 2016 depreciation on all property, plant and equipment has been applied from the year 2012-2013 re balance method which was straight line method previously. Mention the basis of such change depreciation method and also mention the effect of such change on NAV, net profit and EPS. It appears from note 19.00 and 20.00 to the financial statements for the year ended on June 30, 2016 onwards;

Auditor's Disclosure

The Management of the Company has changed the method of depreciation upon a decision of Board of Directors of the Company. Which method of depreciation would be preferable and more realistic depends on the nature of the business and assets. Reducing Balance Method is being preferred when revenue earned during initial year is high and the economic life of the assets is higher than depreciation life. Moreover, it also depends on taxation rate.

Considering the nature of the major fixed Assets, the company has changed its method to reducing balance method as it gives more realistic picture than straight line method. Moreover, It commensurate with that of the Third Schedule of Income Tax Ordinance 1984. The estimated life of an asset with straight line method is much less than that of the economic life of our major capital assets and thus reducing balance method gives more representative and fair presentation of Fixed assets of the company.

The effect of such change on NAV, net profit and EPS are as under keeping the other information as same :

Year ended on	Changes in NAV (With revaluation)		Changes in NAV (without revaluation)		Changes in Net Profit (In Crore)		Changes in EPS	
	Before	After	Before	After	Before	After	Before	After
June 30, 2013	23.57	25.01	20.60	22.04	17.41	29.52	2.18	3.69
June 30, 2014	27.11	28.70	24.14	25.73	16.93	29.63	2.12	3.70
June 30, 2015	31.29	31.89	28.33	28.92	20.89	25.67	2.61	3.21
June 30, 2016	35.98	35.63	32.66	32.31	29.89	27.07	3.74	3.38

It may be mentioned that the company has complied with the provision of BAS 8 regarding change in policy. The Company has been following the depreciation policy consistently since the year of change.

Please provide name wise schedule and subsequent realization of accounts receivable of Tk.76,07,02,135/- ;

Auditor's Disclosure

All the accounts receivables of Aman Cotton Fibrous limited were good and realizable. All the receivables as of June 30, 2016 have been realized subsequently. Name wise schedule and realization status as on June 30, 2017 is given in Annexure-01.

It appears from note 8.00 to the financial statements for the year ended on June 30, 2016 that there is an advance against purchase of Tk 34,63,97,652/- . Please provide name, address of the parties to whom these advances were given. Also mention the reason of such huge advance against purchase;

Auditor's Disclosure

This advance was made against purchase of material as given below:

Parties	Address	Amount (In BDT)	Reason
N. B Brothers	Samsdia Market, Badarpati Road, Boxirhat, Chittagong	69,347,652	In order to get better price, The company often makes advance to suppliers for materials.
Tayyabia Trading	Samsdia Market, Badarpati Road, Boxirhat, Chittagong	19,45,50,000	
Nazimuddin Brothers	952, Osman Manzil, Asadgonj, Chittagong.	8,25,00,000	
Total		34,63,97,652	

It also appears from note 8.00 to the financial statements for the year ended on June 30, 2016 that there is an advance against land purchase of Tk. 6,55,00,000/- given to related parties. Please mention the current status of this advance and weather these transaction/agreements were made on arms length basis or not;

Auditor's Disclosure

This advance was made against purchase of factory land measuring 316.25 decimal in the name of two parties under Registered Baina Deed. The total agreed value of the land is Tk 12,33,37,500 against which Tk 6,55,00,000/- was made as advance. The land is under the possession of Aman Cotton Fibrous Ltd. Some civil construction has been made on the land by the company. Considering the commercial value and economic significance of the land of surrounding areas, the price appears to be reasonable.

Year-wise break-up of interest charged on different bank loans, capitalization of loan interest and interest charged as financial expenses on the income statement;

Auditor's Disclosure

Year-wise break-up of interest charged on different bank loans is under:

Year wise break up	2016	2015	2014	2013	2012
Interest charged on Long term Loan	20,593,735	26,287,589	41,324,049	55,461,334	59,246,236
Interest charged on Short term Loan	54,529,872	51,739,923	40,836,216	26,489,769	54,265,183
Interest Capitalization	Nil	Nil	Nil	Nil	Nil
Financial Expenses	75,123,607	78,027,512	82,160,265	81,951,103	113,511,419

It appears from statement of Comprehensive Income for the year ended on June 30, 2016 that a provision/contribution has been made @5% on Profit before Tax for WPPF 2015-2016 and 2014-2015 Tk. 15,972,441 and Tk. 1,50,96,087.00 respectively. But the amount of distribution from this fund among workers during these two years is not mentioned in the audited financials and there is no such item like provision for WPPF in the statement of financial position. Mention the reason behind this. Also disclose whether this fund is formed, managed, used (distributed) and invested as per section 234, 235, 240 and 242 of Bangladesh Labor (Amendment) Act, 2013;

Auditor's Disclosure

Provision for WPPF has been disclosed under Note – 18 : Liabilities for Expenses and Others of the Notes to the Financial Statements. Moreover, the closing balance of WPPF as disclosed under the Note has been derived after adding the provision for current year and subtracting the payments made during the year.

ACFL has been providing required provision for WPPF since FY 2011-2012 and distributing the same amongst the employees as per law. Now the company has formed a Board of Trustee as required by Section 235 of the Bangladesh Labor (Amendment), Act 2013, accordingly this fund will be distributed by the board of Trustee. Movement of WPPF is given below:

Particulars	For the year ended June 30, 2016	For the year ended June 30, 2015
Opening Balance	1,86,31,491	1,93,32,094
Add: Provision during the Year	15,972,441	1,50,96,087
Less: Distributions	1,35,86,478	1,57,96,690
Closing Balance	21,017,454	1,86,31,491

It is observed from the statement of ratio analysis that Return on Asset and Return on Equity' of the company are declining sharply year by year. Provide auditor's explanation in this regard;

Auditor's Disclosure

The investment in the fixed assets had been increased consistently over the years in order to meet the increasing demand of the buyers. Moreover, the equity of the company has also increased year after year due to increase in profitability against which no outflow i.e. dividend had been paid since 2013. Moreover, ACFL has revalued its fixed assets that contributed to increase the equity in the form of Revaluation Reserve. So, due to increase in investment in fixed assets, undistributed accumulated profit and revaluation surplus, the Return on Assets and Return on Equity have been decreased.

It appears from note 30.00 to the financial statements for the year ended on June 30, 2016 that the company has contingent liabilities regarding income tax assessment order by DCT which is now under Appeal with the Tax Authority. It is also observed that the company has not made any provision for this contingent liability. As such, please mention how the company will pay its liability if the verdict goes against the company;

Auditor's Disclosure

Aman Cotton Fibrous Limited had disclosed the event as contingent liability instead of making provision in the financial statements on the ground that the Company has filed appeal to the higher tax authority stating that 'learned Deputy Commissioner of Taxes disallowed certain expenses hypothetically without assigning any reason merely on surmise which was unjustified and unlawful'. To our assessment, we are of the opinion that it is likely that the order of the Tax authority would come in favor of the Company and hence no provision has been made in the accounts and thereby disclosed as contingent liability. If for any reasons, which has remote possibility, the decision goes against the Company (partly or fully), necessary provision would be made as per para 30 of BAS 37 at the time of disposal of the order by the tax authority and the Company has the financial strength to pay the liability out of cash from operating activities.

Whether the company has complied with the provision of the section 103 of the Companies Act, 1994 regarding loan to directors or their related companies as shown in 'note 9.00;

Auditor's Disclosure

The company extended temporary financial support to its sister concern to meet their short term requirements as per usual practice. So far our understanding of the concept of Section 103 of The Companies Act, 1994 we are of the opinion that this Section is applicable for lending Company only.

It appears that the company has not made any provision regarding appeal made to the Tax Authority against order of DCT as shown in note 30., Explain whether it complies with BAS;

Auditor's Disclosure

Aman Cotton Fibrous Limited has complied with BAS 37 disclosing the event as contingent liability according to paragraph 86 as it is not probable that an outflow of resources embodying economic benefits is remote to settle the obligation as per paragraph 27 and 28 of BAS 37.

Specify whether changes in depreciation method in the year ended 30th June 2013 had been accounted for in accordance with the requirement of the paragraph 61 of the BAS-16;

Auditor's Disclosure

The company has accounted for changes in depreciation method in the year ended 30th June 2013 in accordance with the requirement of the paragraph 61 of the BAS-16.

Information as per requirement of schedule XI part I I Para 4 are not disclosed;

Auditor's Disclosure

Disclosure as per Schedule XI para 4 of the Companies Act 1994, for remuneration paid to Managing Director and directors as shown in the note: 31.00 of the notes to the financial statements is given in Annexure -02.

Additional Disclosures of the Management.**Statement Regarding Cost Audit**

This is to certify that, as per provision of the Companies Act 1994, Cost Audit by Professional Accountant is not applicable for Aman Cotton Fibrous Limited.

Sd/- Noornavi Bhuiyan, FCA CFO Aman Cotton Fibrous Ltd	Sd/- Md. Rafiqul Islam Managing Director Aman Cotton Fibrous Limited	Sd/- Md. Sohel Rahman Chief Executive Officer (Additional Charge) ICB Capital Management Limited
---	---	--

It appears from note 12.00 to the financial statements for the year ended on June 30, 2013 and revaluation report done by S. H. Khan & Co. Chartered Accountant that land and land development has been revalued at Tk. 46,43,38,000.00, the cost price of which is only Tk. 1,66,37,965.00 which is about 28 times higher than cost price. Please mention the reason for such high revaluation by the revaluer.

Reply of ACFL: As per Note 12.00 of the financial statements for the year ended on June 30, 2013, the Book Value of the revalued asset was Tk. 185,025,622 while the Market Value was Tk. 464,338,000 which is 2.50 times. Compared to the unusual price hike in the real estate sector in the last decade, fair value which is 2.50 times of the cost price, seems normal.

It is observed that the company have started their business with an initial capital of Tk. 10 lac in the year 2005 and increased its paid up capital through issuance of bonus share @ 9,900% in the year 2011-12 and @ 700% in the year 2012-13 and total paid up capital stands at Tk. 800 million as of June 30, 2013. Within the short span of 12 (Twelve) years the shareholders equity stands Tk. 285,02,01,690- as on June 30, 2016 which indicates very high growth of the company's performance compared to the industry. Provide management explanation in this regards;

Reply of ACFL: ACFL has started its business in the middle of the last decade and since then the sector has been going through a notable growth except slightest volatility due to global recession for a very short period of time. The spinning business in Bangladesh now and onward seems to be a profitable business due to fair growth of RMG sector. As a result, the company has been growing with satisfactory results from operations. Moreover, ACFL enjoyed Tax Holiday facility for four years from 01 November 2007 to 31 October 2011. Thereafter, ACFL has been enjoying special corporate tax rate of 15%. Moreover, revaluation reserve has contributed to the increase in equity. Last but not the least, ACFL's operation are efficiently managed by a pool of qualified and experienced people added with high-tech machinery that has a significant impact on the profitability of the Company. The combined effect of all these together had a notable impact on shareholders' equity and growth of company's performance.

It appears from the draft prospectus that Aman Cotton Fibrous Limited was established as a backward linkage (partial) to the companies under Aman group. As per audited financials of the last three full years, about 20% products of Aman Cotton Fibrous Limited was sold to Aman Tex Limited. Aman Cotton Fibrous Limited is concentrated on the companies under Aman group for major portion of its revenue/sale proceeds. There is also a conflict of interest with regard to pricing of products of Aman Cotton Fibrous Limited. Under-pricing of Aman Cotton Fibrous Limited's products will lower the production cost of its sister/associated concerns and help to make high profit to its sister/associated concerns. But, profitability of public company- Aman Cotton Fibrous Limited will be hampered due to under pricing as well as demand by the companies under Aman group . Please explain as to how mitigate the risk of concentration on the companies under Aman group for revenue/sale proceeds as well as justify pricing policy of Aman Cotton Fibrous Limited's products as to mitigate such conflict of interest and incorporate such risk under risk factors;

Reply of ACFL: More than 60% of our products are sold to unrelated parties. Since our products are having higher demand from the buyers because of its quality, we don't perceive any challenges for selling of the products that we are currently selling to our sister concern. It may be mentioned that the price charged to our sister concern namely Aman Tex Limited is similar to that of other price i.e. no price differentiation is made. Although we are not currently exposed to general public, we shall be more careful in future to avoid any conflict of interest after going to IPO. We have incorporated the aforesaid risk under the risk factors.

In Chapter VI you have shown that your projected revenue will increase from Tk. 163.76 crore to Tk. 352.86 crore from year 1 to year 3. However, last five years revenue (Chapter VI) shows that each year your company's revenue had decreased from previous year. Explain about this contradictory information shown in Chapter VI;

Reply of ACFL:As we have disclosed that ACFL has an expansion program for increasing the existing capacity of 19,000 MT to 44,000 MT per day that represents an increase of 231 percent of its existing capacity. The projection has been made on the assumption that the expansion project will run at 95% capacity and we are convinced that the growth of our RMG sector will sustain. The industry is now the single biggest export earner for Bangladesh that accounts for 81% of total export earnings of the country and its prospect is very bright. Considering our quality of products, local demand and sectoral growth, we firmly believe that the targeted revenue can be achieved. May we draw our kind attention to the fact that during the last financial year there was no considerable fall in the quantity sold rather due to fall in the price of RMG product in the global market, the revenue seems to have been decreased.

It appears from note 9.00 to the financial statements for the year ended on June 30, 2016 that the company had given loan of Tk. 12,93,76,835/-to its three (03) sister concern. It also appears from note 14.00 to the financial statements for the year ended on June 30, 2016 that the company has long term loan of Tk. 8,37,71,435/- , Provide the justification of given loan to sister concerns instead of paying off the long term loan for which the company has to pay interest;

Reply of ACFL:The sister concerns of Aman Group provide short-term financial support to each other to meet its temporary needs. We acknowledge the rational of your concern and noted the same with appreciation. We are also of the opinion that financial charge on such facility would ensure more transparency in the operations of the group activities. And with a view to that we have decided to settle all the outstanding transactions at the earliest for the greater interest of the stakeholders more particularly for the prospective shareholders. It is relevant to mention that Management has already started charging interest on outstanding balance @ 11.00% p.a. since the date of disbursement that has been fairly reflected in the financial statements ended on 30 June 2016.

Mutation and rent receipt for 0.50 decimal of land for which Mutation and rent receipt were not submitted earlier;

Reply of ACFL: We purchased 180 decimal Land out of total area of 199 decimal under the same DAG # 7739 and got mutation for 179.50 decimal i.e. 0.50 decimal less than the area mentioned in the deed. It may be mentioned that the rest 19 decimal (199-180) were sold to other two parties. In the process of mutation, the seller made a plea to the AC Land office during the hearing against the notice issued in favor of the seller of Land for mutation purpose. During hearing the seller of the land requested the AC Land office for excluding 0.50 decimal land on which there was a family graveyard. From humanitarian and religious ground, we have finally agreed to the plea of the seller and hence the land areas in the mutation were less than the area mentioned in the Land Deed by 0.50 decimal. Thus we could not submit the rent receipt and mutation for that 0.50 decimal land.

You have not made any group insurance as per requirement of 'Labour Law';

Reply of ACFL: The Company has taken necessary steps to do group insurance policy under the leadership of BTMA which is the authority to execute the same for all export oriented industries. The company has taken steps to execute the same.

It is observed that Managing Director of the company is also Managing Director of some other companies. Explain regarding the compliance of Section 109 of the Company Act 1994;

Reply of ACFL: Mr. Rafiqul Islam has been serving as Managing Director of some other sister concerns. In this connection, necessary approval has been obtained from the Ministry of Commerce to act as Managing Director of some other companies in compliance with the requirement of Section 109 of Companies Act, 1994.

AUDITED FINANCIAL STATEMENTS
FOR THE YEAR ENDED JUNE 30, 2017

Independent Auditor's Report
To the Shareholders of
AMAN COTTON FIBROUS LIMITED

Report on the Financial Statements

We have audited the accompanying Financial Statements of AMAN COTTON FIBROUS LIMITED, which comprise the Statement of Financial Position as at 30 June 2017 and the Statement of Profit or Loss and Other Comprehensive Income, Statement of Changes in Equity and Statement of Cash Flows for the year then ended and a summary of significant accounting policies and other explanatory information.

Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with Bangladesh Accounting Standards (BAS), Bangladesh Financial Reporting Standards (BFRS), The Companies Act 1994, The Securities and Exchange Rules 1987 and other applicable laws and regulations and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with Bangladesh Standards on Auditing (BSA). Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Opinion

In our opinion, the financial statements give a true and fair view of the financial position of the company as at 30 June 2017 and of its financial performance and its cash flows for the year then ended in accordance with the Bangladesh Accounting Standards (BAS), Bangladesh Financial Reporting Standards (BFRS), The Companies Act 1994, The Securities and Exchange Rules 1987 and other applicable laws and regulations.

Report on Other Legal and Regulatory Requirements

In accordance with The Companies Act 1994 and The Securities and Exchange Rules 1987, we further report that:

- a) we have obtained all the information and explanations, which to the best of our knowledge and belief were necessary for the purposes of our audit;
- b) in our opinion, proper books of account as required by law have been kept by the company so far as it appeared from our examination of these books;
- c) the statement of financial position and statement of profit or loss and other comprehensive income dealt with by the report are in agreement with the books of account; and
- d) the expenditure incurred was for the purpose of the company's business.
